c. The JETHUTH do concur with the inclusion of USCLUCEUR/ SACEUR and JETHUTH safe area links in HUCOM OPLAN 186-1 for planning purposes.

- d. EUBARE continues to believe that safe areas should be considered as areas in which survival is peocidio, and which effer the best potential for the wartime development of E&E mechanisms and operations. The JETRUTH have not levied, and at the present time do not intend to levy, a requirement for the peacetime development of E&E assets for those safe areas. If such a requirement should be established, KUBARE will review the situation at that time to determine its course of action.
- 2. The consers expressed by paragraph 4 of the Inference with respect to military WW planning between U.S. and certain fereign UW Perces is a subject which will be discussed further with the JETMFTM. Under extremt JETMUTH policy, U.S. military occudention of UW planning with, and the training and development of, "enconventional warfare/counterinaugumay units" of alited forces is expected to involve only the evert aspects of such activities. Any proposed or anticipated extension of those activities will probably come to the attention of your staff well before the information is received in Washington, both because of your working relationship with EUCOM and because of local KUSAMK responsibility to coordinate all claudeatine activities in the theater. Any proposed or anticipated deplication of KUSAMK programs with alited antions abould be reported to Beautynarters premptly.
